## SUMMARY

Java Backend Developer specializing in scalable REST API design, JPA/Hibernate performance tuning, and cloud-native service deployment. Looking to transition into a high-impact Backend Developer role where I can drive performance optimization, system reliability, and scalable software architecture.

## TECHNICAL Skills

- **Languages:** Java, C++, C
- **Backend:** Spring Boot, Spring Security, REST APIs, JPA, Hibernate, JWT
- **Databases:** MySQL, MongoDB
- **Cloud & DevOps:** Azure, Docker, CI/CD
- **Tools:** Git, IntelliJ IDEA, VS Code

## Experience

### Accenture

Associate Software Engineer

Aug 2024 – Jul 2026

Kolkata, India

- Engineered 15+ high-availability RESTful microservices using Java 17/21 and Spring Boot for an enterprise telecom client, scaling application throughput to process 10,000+ synchronous requests per minute.
- Identified system bottlenecks via log analysis and optimized JPA/Hibernate custom indexes, successfully cutting API latency and query execution time by 22%.
- Containerized 5+ monolithic utilities with Docker across Azure cloud environments, reducing deployment setup configuration time by 40%.
- Automated operational deployment workflows and service validation routines, eliminating manual intervention and decreasing overall maintenance effort by 15%.

## Projects

### PujaPath – Durga Puja Discovery Platform

Sep 2026

Spring Boot, MySQL, Spring Cache, Geolocation

- Engineered a location-aware discovery platform serving 8,000+ active users, exposing REST APIs for real-time pandal navigation, metro routing, and distance estimation.
- Architected normalized relational models in MySQL for many-to-many proximity mapping, integrating external datasets with validation fallbacks to ensure continuous API reliability.
- Integrated Spring Caching to store and reuse external geolocation payload results, eliminating duplicate API calls and cutting peak-traffic query latency by 45%.

### Slotify – Appointment Scheduling Application

Aug 2026

Spring Boot, Java, JPA, MySQL

- Architected a scalable Spring Boot scheduling engine supporting 500+ concurrent bookings with OAuth2/JWT security and pessimistic locking to eliminate race conditions.
- Integrated Google Calendar API and JavaMailSender for real-time 2-way sync while engineering timezone-aware logic to cut multi-region booking conflicts by 40%.

## Education

### Narula Institute of Technology

B.Tech in Electronics and Communication Engineering (CGPA: 8.67)

Nov 2020 – Jun 2024

West Bengal, India

## Achievements

- **Google Cloud Certified – Cloud Digital Leader**
- Research work published under ISBN: 978-93-89817-97-3 ([Page-72](#))
- Secured 1st position in Smart India Hackathon (SIH 2022, Institute Level)

Issued Apr 2025, Expires Apr 2028
